

# TECHNICAL SERVICE BULLETIN

NO. 72 G 4

March, 1972

## SUBJECT:

Passport to Service

## MODELS:

All Models

The purpose of this bulletin is to acquaint all dealers with an entirely new "Passport to Service" designed to cover the entire range of British Leyland vehicles.

This new Passport to Service booklet will be brought into use when stocks of existing booklets are exhausted. The owner's maintenance record should be properly documented at all times in the spaces provided because of the requirements of the U.S. National Emissions Standards Act (part of the Clean Air Act) applicable to 1972 models.

It is also necessary that the Emission Control System Maintenance and Warranty Information leaflet is issued with every new vehicle in addition to the new Passport to Service. (Please refer to previous bulletin 71 G 21).

Should any queries arise after the introduction of the new Passport to Service, they should be brought to the attention of your Distributor's Service Representative.

A sample copy of the cover page appears on the reversed side of this bulletin.
