**SUBJECT:**

Cylinder Head Gasket

**MODELS:**

Austin America

To oblivate cylinder head gasket leakage a modified head gasket part number 12G 2230 was introduced at engine number 12H 2G1B-H-1216 (Manual) and 12H 232B-H-4857 (Automatic). This gasket is interchangeable with the early type and should be installed whenever the cylinder head is removed for any reason.
