TO ALL DISTRIBUTORS AND DEALERS

Re: B.M.C. Approved Performance Test Equipment
Marquette Corporation

After thorough testing, we are able to announce that we have prepared a National Program with the Marquette Corporation of Minneapolis, Minnesota, and your Distributor is now able to offer you the complete range of Marquette equipment at a considerable saving.

This type of equipment is absolutely essential for the correct tuning of 1968 and subsequent model vehicles, all of which will be equipped with Exhaust Emission Control Devices as required by Federal Law (Public Law 88-206 "Clean Air Act").

With this equipment, not only will you meet requirements, but your service profits, your customer satisfaction and confidence will increase tremendously.

Attached is an illustrated sheet of the approved Marquette equipment. To place your order for this equipment, or for further information, contact your Distributor.

INCREASE

- ✓ Profits
- ✓ Service
- ✓ Customer Confidence

With Electronic Engine Analysis

MG · AUSTIN HEALEY · JAGUAR · AUSTIN · SPRITE · MIDGET

✓ **INCREASE PROFITS** — Analyze engine condition quicker and easier to boost repair parts sales and raise the efficiency of your shop and mechanics. Do more tune-up and repair jobs in less time than before.

✓ **INCREASE SERVICE** — Sport car owners demand peak performance from their cars at all times — performance that can come only from a precision tuned engine. Marquette Engine Analyzers provide the precision tuning your customers demand.

✓ **INCREASE CUSTOMER CONFIDENCE** — Marquette engine tune-up equipment adds prestige to your repair department. Your customers will be more assured the job has been done correctly and will be willing to pay professional rates for professional service.

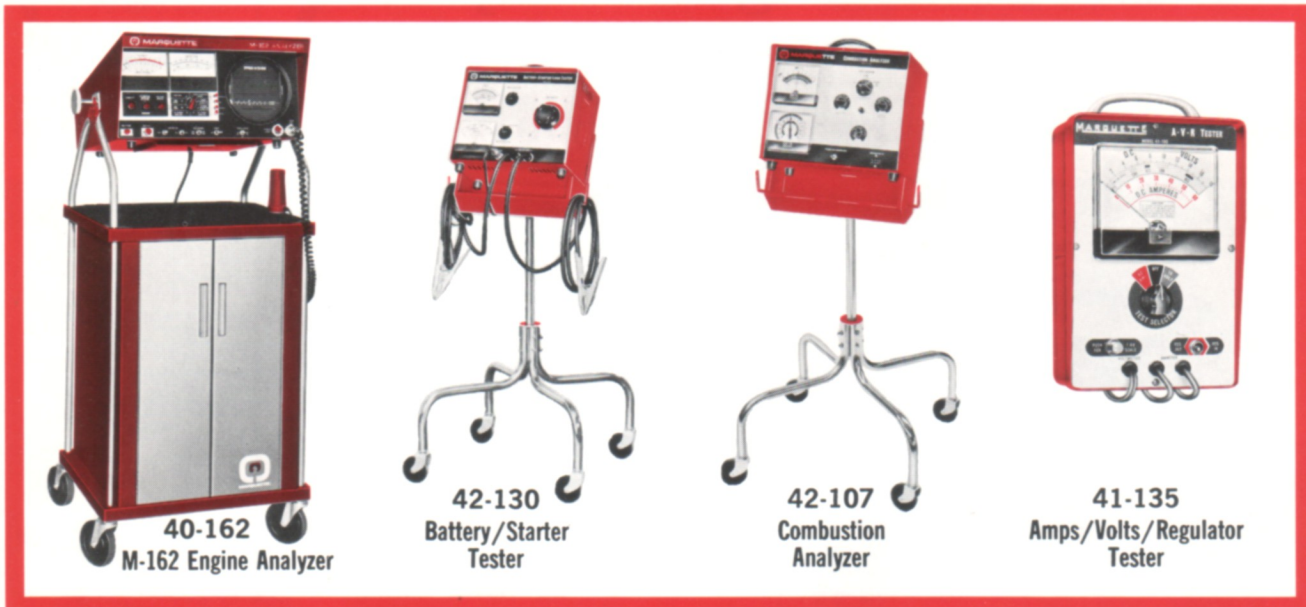

Let **MARQUETTE** Equip Your Tune-Up Bay

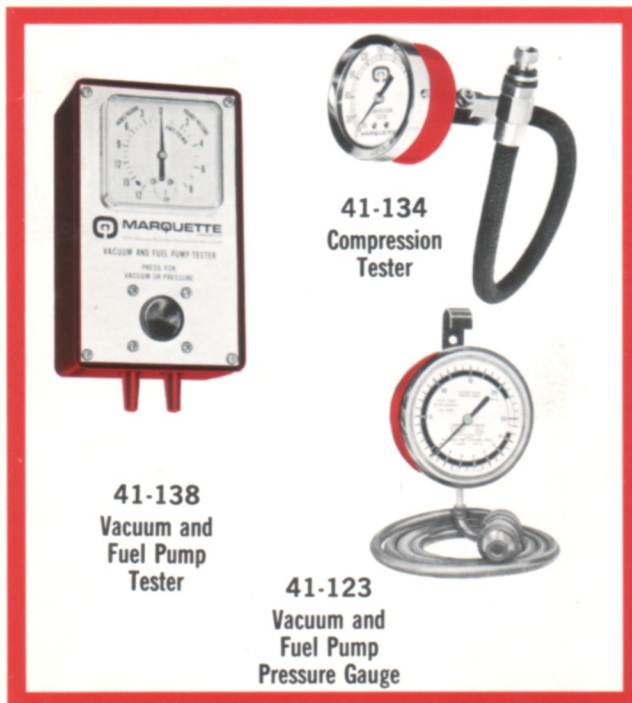

TUNE-UP FOR PROFITS

The MARQUETTE M-162 Engine Analyzer thoroughly tests in 10 to 15 minutes all engine components that affect performance. Four simple connections are all that's required to do a complete engine analysis, including Power Check. You get an accurate test of the car's performance while the engine is running. Also provides easy servicing of emission control devices for smog reduction. Round out your tune-up package with the Battery/Starter Tester, Combustion Analyzer and Amps/Volts/Regulator Tester. Add the Additional Accessory Package and the Battery Service Package for full tune-up capabilities.
